Profile

AI & Data Science student with a solid background in Machine Learning and Deep Learning, currently deepening my expertise in Data Science and analytical thinking. Beyond technical learning, I work as a Problem Solving Instructor, where I train students to think systematically, break down complex problems, and build efficient algorithmic solutions. I'm also the Founder of a university-based Problem Solving Community, leading study groups, mentoring peers, and building a learning-driven environment focused on consistency and real skill development. Combining AI, data, teaching, and community leadership allows me to approach problems with both technical depth and clear communication

Education

BSc in Software Development

2022 – Present

New Assiut Technological University

Assiut, Egypt

- Ranked 2nd in class
- GPA : 3.92

Experience

Ai & Data Science

12/2025 – 07/2026

Digital Egypt Pioneers Initiative - DEPI

Asyut

- Data Science fundamentals including data analysis, data cleaning, and EDA.
- Working with Python (Pandas, NumPy, Matplotlib, Seaborn).
- Applying basic Machine Learning models.
- Developing soft skills and freelancing fundamentals through hands-on projects.

Machine Learning Summer Internship

07/2025 – 08/2025

National Telecommunication Institute (NTI)

Asyut

- Completed intensive training on machine learning algorithms, model building, and deployment.
- Applied supervised & unsupervised learning to real-world datasets.
- Worked with **Python, Pandas, NumPy, TensorFlow, Scikit-learn**.

Founder & Problem-Solving Instructor

2024 – Present

ICPC NATU Community

Asyut

- Designed and delivered **competitive programming training** for students.
- Created original algorithmic problems and hosted contests on **Codeforces**.
- Mentored students for national and international programming competitions.

Skills

Programming & Problem Solving

Python, Java, C++, C, OOP, Data Structures, Algorithms, Competitive Programming, Codeforces Contest Design, Problem Creation

Instruction & Mentorship

Curriculum Development, Coaching 50+ Students, One-on-One Mentorship, Group Training, Explaining Complex Concepts Clearly

Leadership & Community Building

Founder of ICPC NATU Community, Event Organization, Student Engagement, Collaboration with Teams

Data & Tools

TensorFlow, Keras, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Google Colab,

Analytical & Interpersonal

Strong Analytical Thinking, Communication Skills, Time Management, Adaptability, Team Collaboration

Projects

Train Ticket Reservation System

Java, Swing

Developed a desktop application for ticket booking and management, showcasing OOP principles and GUI development.

Task Manager Mobile App

Flutter, Firebase

Built a mobile application for task tracking with cloud-based data storage and real-time synchronization.

Vision-Based Parking System

Python, OpenCV

Created a real-time vehicle detection and parking space monitoring system; won **1st place** in a university competition.

Contest & Problem Creation on Codeforces

Python, C++

Designed original algorithmic problems and organized contests for ICPC NATU training.
